Wave Motion 24 (1996) 437–438

WAVE MOTION

Contents of Volume 24

Vol 24, No. 1

C.V. Hile
Comparisons between Maxwell's equations and an extended nonlinear Schrödinger equation 1
J. Ying and W. Sun
A direct optimization approach to the two-dimensional acoustic inverse problem in the time domain 13
S. Zeroug, F.E. Stanke and R. Burridge
A complex-transducer-point model for finite emitting and receiving ultrasonic transducers 21
H.G. Georgiadis and A.P. Rigatos
Transient SIF results for a cracked viscoelastic strip under concentrated impact loading – An integral-transform/function-theoretic approach 41
G.D. Manolis and R.P. Shaw
Green's function for the vector wave equation in a mildly heterogeneous continuum 59
A. Karlsson
Wave propagators for transient waves in one-dimensional media 85
I. Andronov, B.P. Belinskiy and J.P. Dauer
Acoustic scattering by a narrow crack in an elastic plate 101

Vol. 24, No. 2

Z.-P. Liao
Extrapolation non-reflecting boundary conditions 117
Y. Agnon and M. Glozman
Periodic solutions for a complex Hamiltonian system: New standing water-waves 139
V. Romano
Asymptotic waves for the hydrodynamical model of semiconductors 151
Y. Chen and P.L.-F. Liu
On interfacial waves over random topography 169
A.R.M. Wolfert, A.V. Metrikine and H.A. Dieterman
Wave radiation in a one-dimensional system due to a non-uniformly moving constant load 185
N. Peake
Sound radiation from sources close to a corner in supersonic flow 197
J.B. Haddow and L. Jiang
A study of finite amplitude plane wave propagation in a rubber-like solid 211

Vol. 24, No. 3

C.-Y. Wang and J.D. Achenbach
Lamb's problem for solids of general anisotropy 227
W. Choi and T. Yao-tsu Wu
Vortex solitons in a rotating fluid within a non-uniform tube 243
Rakesh and P. Sacks
Impedance inversion from transmission data for the wave equation 263

(*Continued overleaf*)

Alexander A. Doinikov
Acoustic radiation pressure exerted by a spherical wave on a bubble in a viscous liquid 275
K. Trulsen and K.B. Dysthe
A modified nonlinear Schrödinger equation for broader bandwidth gravity waves on deep water 281
A.A. Minzoni and N.F. Smyth
Evolution of lump solutions for the KP equation 291
B.V. Budaev and D.B. Bogy
Rayleigh wave scattering by a wedge II 307
D. Luo
Envelope solitary Rossby waves and modulational instabilities of uniform Rossby wave trains in two space dimensions 315

Vol. 24, No. 4

L. Ryzhik, G. Papanicolaou and Joseph B. Keller
Transport equations for elastic and other waves in random media 327
P. Borejko
Reflection and transmission coefficients for three-dimensional plane waves in elastic media 371
M. İdemen and E. Erdoğan
High-frequency surface currents induced on a spherical reflector by the edge-diffraction of obliquely incident waves 395
J.A. DeSanto and P.A. Martin
On angular-spectrum representations for scattering by infinite rough surfaces 421
